

Esercizi sui tipi di frazioni

Indicare con una X se le frazioni seguenti sono proprie, improprie o apparenti:

Frazione	Propria	Impropria	Apparente
1. $\frac{1}{3}$			
2. $\frac{4}{5}$			
3. $\frac{9}{7}$			
4. $\frac{8}{4}$			
5. $\frac{1}{5}$			
6. $\frac{14}{2}$			
7. $\frac{21}{9}$			
8. $\frac{13}{5}$			
9. $\frac{1}{12}$			
10. $\frac{2}{42}$			
11. $\frac{7}{1}$			
12. $\frac{12}{4}$			
13. $\frac{1}{10}$			
14. $\frac{46}{7}$			
15. $\frac{900}{9}$			
16. $\frac{1}{41}$			
17. $\frac{2}{16}$			
18. $\frac{54}{27}$			

19.	$\frac{4}{16}$			
20.	$\frac{19}{9}$			
21.	$\frac{100}{10}$			
22.	$\frac{2}{24}$			
23.	$\frac{47}{98}$			
24.	$\frac{99}{33}$			
25.	$\frac{9}{71}$			
26.	$\frac{12}{7}$			
27.	$\frac{21}{3}$			
28.	$\frac{14}{18}$			
29.	$\frac{9}{81}$			
30.	$\frac{1}{7}$			
31.	$\frac{29}{3}$			
32.	$\frac{73}{2}$			
33.	$\frac{56}{8}$			
34.	$\frac{75}{75}$			
35.	$\frac{4}{400}$			
36.	$\frac{51}{3}$			
37.	$\frac{18}{42}$			
38.	$\frac{1000}{10}$			

Scrivere il numero mancante in modo tale che la frazione risulti propria:

- | | | | | | | | |
|-----|---------------------|-----|---------------------|-----|---------------------|-----|---------------------|
| 39. | $\frac{\quad}{4}$ | 40. | $\frac{2}{\quad}$ | 41. | $\frac{\quad}{7}$ | 42. | $\frac{5}{\quad}$ |
| 43. | $\frac{\quad}{9}$ | 44. | $\frac{8}{\quad}$ | 45. | $\frac{10}{\quad}$ | 46. | $\frac{\quad}{12}$ |
| 47. | $\frac{13}{\quad}$ | 48. | $\frac{15}{\quad}$ | 49. | $\frac{\quad}{16}$ | 50. | $\frac{18}{\quad}$ |
| 51. | $\frac{\quad}{20}$ | 52. | $\frac{\quad}{29}$ | 53. | $\frac{23}{\quad}$ | 54. | $\frac{40}{\quad}$ |
| 55. | $\frac{\quad}{50}$ | 56. | $\frac{\quad}{71}$ | 57. | $\frac{82}{\quad}$ | 58. | $\frac{100}{\quad}$ |
| 59. | $\frac{\quad}{123}$ | 60. | $\frac{\quad}{150}$ | 61. | $\frac{256}{\quad}$ | 62. | $\frac{327}{\quad}$ |

Scrivere il numero mancante in modo tale che la frazione risulti impropria:

- | | | | | | | | |
|-----|---------------------|-----|---------------------|-----|---------------------|-----|---------------------|
| 63. | $\frac{3}{\quad}$ | 64. | $\frac{\quad}{6}$ | 65. | $\frac{7}{\quad}$ | 66. | $\frac{\quad}{12}$ |
| 67. | $\frac{13}{\quad}$ | 68. | $\frac{\quad}{18}$ | 69. | $\frac{21}{\quad}$ | 70. | $\frac{25}{\quad}$ |
| 71. | $\frac{31}{\quad}$ | 72. | $\frac{\quad}{33}$ | 73. | $\frac{39}{\quad}$ | 74. | $\frac{41}{\quad}$ |
| 75. | $\frac{\quad}{43}$ | 76. | $\frac{57}{\quad}$ | 77. | $\frac{69}{\quad}$ | 78. | $\frac{\quad}{71}$ |
| 79. | $\frac{93}{\quad}$ | 80. | $\frac{\quad}{99}$ | 81. | $\frac{103}{\quad}$ | 82. | $\frac{\quad}{107}$ |
| 83. | $\frac{158}{\quad}$ | 84. | $\frac{\quad}{200}$ | 85. | $\frac{\quad}{237}$ | 86. | $\frac{\quad}{300}$ |

Scrivere il numero mancante in modo tale che la frazione risulti apparente:

87. $\frac{\quad}{2}$

88. $\frac{8}{\quad}$

89. $\frac{12}{\quad}$

90. $\frac{18}{\quad}$

91. $\frac{\quad}{22}$

92. $\frac{\quad}{30}$

93. $\frac{36}{\quad}$

94. $\frac{40}{\quad}$

95. $\frac{\quad}{50}$

96. $\frac{62}{\quad}$

97. $\frac{75}{\quad}$

98. $\frac{100}{\quad}$

99. $\frac{121}{\quad}$

100. $\frac{200}{\quad}$

101. $\frac{\quad}{225}$

102. $\frac{250}{\quad}$

103. $\frac{275}{\quad}$

104. $\frac{\quad}{300}$

105. $\frac{\quad}{325}$

106. $\frac{400}{\quad}$

107. $\frac{480}{\quad}$

108. $\frac{\quad}{500}$

109. $\frac{\quad}{600}$

110. $\frac{700}{\quad}$
